**THE
PERFECT
BUILDERS
MATE**

The rust-free plastic moulded **PolyBarrow** – the workhorse barrow that understands the way you work.

Uncompromisingly constructed, this heavy duty wheelbarrow is designed for the toughest jobs and the most demanding builders. When you need to rely on a barrow that will take the strain of the day's work, carry impressive weights and still come back for more, **PolyBarrow** is the only choice.

The oversized one-piece bucket holds six builders' blocks; and no rivets means no stress points, preventing the extra thick 6mm double-ply skin from splitting. **PolyBarrow** will be still wheeling long after you've dumped a traditional barrow.

- One-piece extra strong LLDPE polyethylene moulding
- No bolt or rivet stress points securing the bucket like other barrows
- 400mm 4-ply pneumatic wheel for manoeuvrable lightweight strength
- Front axle attached with 25mm nylon rod for strength
- Non-corrosive stainless steel washers, bushes and split pins
- Full size 90 litre bucket
- Handy rugged grip handles
- Strong, long handles for easy manoeuvrability - no more bashed knees
- Sturdy feet

Extra strong tipping bar won't twist out of shape or impede the wheel

Amazingly strong twin skin oversized bucket will carry that weight

Strengthening skirt makes the usefully long handles extra rigid

SPECIFICATIONS

LENGTH	1540 mm
WIDTH	615 mm
HEIGHT	620 mm
WEIGHT (EMPTY)	12Kg
CAPACITY	90 Litres

AVAILABLE IN A RANGE OF COLOURS

Quality engineering in plastic

PolyBarrow is manufactured by the Polytank Group. A company synonymous with quality and innovation in plastic, Polytank Group is a market leader in rotational moulding technology and offers a level of customer service and support that is second to none.
